BASIC-ABSTRACT:

Synthetic resin or rubber contg. hard magnetic material is spun and the resulting fibre is subjected to weaving and knitting and then magnetised to mfr. fibre goods which are magnetic. the hard magnetic material is metal ferrite powder. A mixt. of 100 pts. wt. of the synthetic resin or rubber and 30-1000 pts. wt. of the metal ferrite powder is used for mfg. the fibre goods. The synthetic resin or rubber is chlorinated polyethylene or a compsn. contg. chlorinated polyethylene. Woven synthetic resin or rubber is magnetised in the belt form.

The fibre goods are worn on human body to promote human health.
